RE: IPRS Target Populations for SFY 04 (Effective July 1, 2003), Summary of Target Population Changes and Updated IPRS/Diagnosis Spreadsheet

DATE: June 13, 2003

Attached are the IPRS Target Populations for SFY 04 (effective July 1, 2003), a summary of the Target Population Changes and the updated IPRS/Diagnosis Spreadsheet. As stated in the draft State Plan 2003, changes in target populations were not included in that document, however, subsequent changes would be reflected in the final State Plan 2003 to be released for July 1, 2003. Changes in the final State Plan 2003 for Target Populations will be those reflected in the attached material.

The target populations continue to be divided into 6 groups: Adult Mental Health, Child Mental Health, Adult Substance Abuse, Child Substance Abuse, Adult Developmental Disability and Child Developmental Disability. Within each target population group are individual target populations. In addition to the aforementioned target population groups, there are a couple of tracking target populations: CDF and TANF.

The transitional non-covered target populations will continue to be in effect for SFY 04 – through June 30, 2004. As stated in the current draft of State Plan 2003 in Chapter 6, transitional non-covered populations will continue to be allowed for settlement purposes for services provided through June 30, 2004. For this one-year extension for transitional non-covered populations, there are several important factors to take into consideration:

- a. Again, as stated in Chapter 6 of the draft State Plan 2003, "The LME may not enroll any new consumers who do not fit into the target population other than for those services that are considered entitlements...or that have been identified as services provided through the core functions." Enrolling new consumers who do not fit into the target populations would, therefore, be limited to entitlements to Medicaid services and when other service providers are not available.
- b. Per Chapter 6 of the draft State Plan 2003, SFY 04 settlement instructions will be issued during the first quarter of SFY 04. These instructions will address the manner in which the value of services to transitional non-covered populations will be handled in the SFY 04 settlement process. At this point, we anticipate this will be handled in essentially the same manner as indicated for SFY 03 settlement.

# **Summary of IPRS Target Population Changes for FY03/04**

## **General Changes for FY03/04**

- Reformatted target population definition sheets to separate target population eligibility criteria from covered services, provider restrictions, funding sources and utilization management.
- Added concurrency issues as eligibility criteria for each target population
- All diagnosis changes are highlighted in the IPRS/Diagnosis Spreadsheet and, when necessary, comments were also added

## **Adult Mental Health**

- Clarified use of GAF score in eligibility determination of AMSPM and AMSMI
- Eliminated diagnosis codes in the 300.00-300.99 range. Exceptions were: 300.01, 300.21 and 300.3 from both AMSMI and AMPAT and 300.14 from AMSMI. Also eliminated 311 from AMSMI and AMPAT
- Added 293.83 and 301.20 for AMSMI:
- Added 301.20 for AMPAT

## **Child Mental Health**

- Added definitions to clarify the Child Mental Health target population eligibility criteria
- Added clarification for meaning of at imminent risk of homelessness to CMPAT to be consistent with AMPAT
- Added a note to CMPAT that there may be a need to use “John Doe” clients for outreach to people who refuse to give their name
- Reworded several of the eligibility criteria to clarify the intent of the target population

## **Adult Substance Abuse**

- Added “who are in need of treatment for a primary alcohol or drug abuse disorder” to all Adult Substance Abuse target populations except ASAO and ASCEP
- Added a note of the data requirements of the client’s service record
- Added a statement on the need for a primary diagnosis of alcohol or drug abuse disorder
- Deleted diagnosis codes 291.0-292.9 and 305.00-305.93 from ASHMT to limit diagnosis to dependence only diagnoses
- Added new criteria for ASDSS eligibility “Are DSS involved individuals who have been convicted of a Class H or I Controlled Substance Felony in North Carolina, and who are applicants for or a recipient of Food Stamps”
- Clarified Child Protective Services eligibility criteria for ASDSS “where there is a Child Protective Services report for child abuse, neglect, or dependence that is being assessed, or where there is a finding of a need for Child Protective Services or a case decision of substantiation by Child Protective Services”
- Changed the word “convicted” to “arrested” for DWI in ASDWI

**Child Substance Abuse**

- Added new child substance abuse target population CSMAJ Child in the Majors SA/JJ Program
- Added “who are in need of treatment for a primary alcohol or drug abuse disorder” to all Child Substance Abuse target populations except CSAO, CSSP, CSIP and CSCEP
- Added a note of the data requirements of the client’s service record
- Added a statement on the need for a primary diagnosis of alcohol or drug abuse disorder
- Only allowable diagnosis code for CSSP and CSIP will be V65.42
- Clarified the meaning of “currently” as “or in the previous six months has experienced” in both CSSP and CSIP
- Changed the word “convicted” to “arrested” for DWI in CSDWI

**Adult Developmental Disability**

- Clarified SNAP score for ADSN\* target population
- All Area Programs should phase in the conversion of ADSN1-5 to ADSN during fiscal year
- Deleted prior approval for Fiscal Supports and Individual Supports in ADMRI

**Child Developmental Disability**

- Clarified SNAP score for CDSN\* target population
- All Area Programs should phase in the conversion of CDSN1-5 to CDSN during fiscal year
- Clarified wording on eligibility for children age 3-5 in CDECI

- c. In order for the Division to accumulate information regarding the value of services to the transitional non-covered populations, area/county programs/LMEs must report the appropriate information to IPRS. Without this reporting, there will be no way to include the value of such services at the time of settlement for SFY 04.

The target population definition sheets have been reformatted. They are divided into 2 sections. Section 1 defines the target population eligibility criteria: detail eligibility criteria, ICD-9 diagnosis ranges and concurrency issues. Section 2 details service array, provider restrictions, funding sources and utilization management information. Section 1 for each individual target population defines the eligibility criteria for an individual to be placed into that target population. The IPRS eligibility matrices, developed this year for use by area programs, will be updated to reflect the eligibility criteria changes. They will be e-mailed to all area program IPRS Coordinators within the next week.

A summary of the target population changes has been included to highlight the most significant changes to the eligibility criteria for a target population, however, attachments should be closely reviewed in their entirety. Changes in wording that were made to clarify the intent of the eligibility criteria have not been included in the summary document. We have also included the updated IPRS/Diagnosis Spreadsheet. Diagnosis changes have been highlighted on the spreadsheet for easy reference by clinical staff. The SFY 04 Arrays of Service are scheduled for publication in the next week.

If you have any questions or concerns, please feel free to contact Gary Imes at (919) 715-7774 or via e-mail to [gary.imes@ncmail.net](mailto:gary.imes@ncmail.net) or Betty Cogswell at (919) 255-3718 or via e-mail to [betty.cogswell@ncmail.net](mailto:betty.cogswell@ncmail.net).
